

One-Page Cheat Sheet

For those who are driven to get started *right now*, without filler or fluff

1. Install TheFormTool

Double-click the .zip file you downloaded to see the files it contains. Double-click the .docm file (**TheFormTool.docm** or **TheFormToolPRO.docm**) to install the program.

2. Activate it

If you purchased TheFormTool PRO, go to the new TheFormTool tab in Microsoft Word, click  **Options, License Code**, and enter the Registered Name and License Code we emailed to you.

► Skip Steps 3 and 4 and watch our 3-minute video instead: www.video1.theformtool.com

3. Create a form

Open a document or form you've used in the past, and save a copy wherever you like to store forms.

Add a Q&A table at the bottom of the form by clicking  **Table** on TheFormTool tab. Type questions in the Question column and a short label for each question in the Label column.

Add fields to the form by placing the cursor wherever a field is needed and clicking  **Field** on TheFormTool tab. Then save and close the finished form.

4. Use your new smart form to create a document

Open the form you created in Step 3. Type answers in the Q&A table and click  **Fill** on TheFormTool tab. Done!

5. For later

This manual and the Expert User Guide are available at www.theformtool.com, along with videos, program support, and forums where you can ask questions, report problems, make suggestions, and exchange Tool Tips with the creators and other users of TheFormTool.

Turn off all computer security systems before opening the installation .docm file!

If you're uncertain how to do that, here is an article our Knowledge Base discussing some of the major players.
